

## SICLA SEAT UPHOLSTERY

The Sicla seat upholstered chair is made from a polypropylene shell with an upholstered seat pad (permanently) secured to the chair. The Seat pad has the benefit of extra comfort as well as the choice of fabric or leather.

## SICLA CLASSIC UPHOLSTERY

The Sicla Classic upholstered chair is made from a polypropylene shell with a foamed upholstery insert, with a single fabric cover pulled over the insert and smoothed over foam. Not all fabrics are suitable for upholstery method, so please check with our office before purchasing fabrics you are not familiar with.

This method of upholstery is not suitable for Leather, Velvets and other fabrics without stretch, Coated fabrics, Vinyls and other fabrics with bonded backings.

This Classic upholstery option provides extra comfort in its application of an upholstered inner whilst still showcasing the outer polypropylene shell and back detail that is a prominent feature of the Sicla range.

# SICLA LUXE UPHOLSTERY

The Sicla Luxe upholstered chair is made from a polypropylene shell with a foamed upholstery insert, with a single fabric cover pulled over the insert and smoothed over foam. The seat pad is made up using a timber ply with foam applied, it is then upholstered as required and secured to the chair. The Seat pad has the benefit of extra comfort as well as the appearance of a luxury visitor chair.

The additional seat pad allows the client the opportunity to mix different colours or different fabric types for a personalised finish. This method of upholstery is necessary for Leather, Velvets and other fabrics without stretch, coated fabrics, Vinyls and other fabrics with bonded backings.

The combination of an upholstered inner as well as an additional seat pad provides clients with the most luxurious option of upholstery, whilst still showcasing the outer polypropylene shell and back detail that is a prominent feature of the Sicla range.
